DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsukii, U.S. Patent # 5,027,084.

Figs. 1, 2, and 8 disclose a circuit comprising: two transmission lines (30 and 32), at least two amplifiers (FET 1, FET 2), said amplifiers being coupled anti-parallel to said transmission lines; the nodes to the gates of FET1, FET 2 can be read as coupling means.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tsukii, U.S. Patent # 5,027,084.

Although Tsukii does not mention that his coupling means are directional coupling circuits, directional coupling circuits are just different type of coupling circuits and it would have been obvious at the time the invention was made to a person having ordinary skill in the art to substitute one for the other in order to have best performance for the circuits since this is a matter of design choice.

Allowable Subject Matter

Claims 7-9 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 5,821,813, # 6,798,281 B2, # 6,759,907 B2, # 5,361,038, # 6,392,790 B1 contain some limitations of the claimed invention .
